

Table I – Minimum VFR Flight Visibilities and Distance From Clouds

Airspace classes	Flight Visibility	Distance from Cloud
A	Not Applicable	Not Applicable
B	at and above 10000 feet above mean sea level – 8 km below 10000 feet above mean sea level – 5 km	Clear of cloud
C	at and above 10000 feet above mean sea level – 8 km	1500 m horizontally 1000 feet vertically
D	below 10000 feet above mean sea level – 5 km	
E		
E Surface		
G	1. 5 km. 2. For civilian helicopter, Helicopters, except civilian helicopter, may permitted to operate in less than 1,500 m flight visibility, if maneuvered at a speed that will give adequate opportunity to observe other traffic or any obstacles in time to avoid collision. 3. Helicopters, except civilian helicopter, may permitted to operate in less than 1,500 m flight visibility, if maneuvered at a speed that will give adequate opportunity to observe other traffic or any obstacles in time to avoid collision.	1.Higher than 3,000 feet above mean sea level or 1,000 feet above terrain ( whichever is higher ) — — 1500 m horizontally,1000 feet vertically 2.Lower than or equal to 3,000 feet above mean sea level or 1,000 feet above terrain ( whichever is higher ) — — clear of cloud and with surface in sight.
