## Aviation Safety Bulletin

ASB No: 112-068/O

Jun 29, 2023

### Subject:

#### **Transfer European Helicopter Safety Team (EHEST) Leaflet HE-12 Helicopter Performance:**

- 一、 This leaflet was developed by the European Helicopter Safety Implementation Team (EHSIT), a component of the European Helicopter Safety Team (EHEST). The EHSIT is tasked to process the Implementation Recommendations (IRs) identified from the analysis of accidents performed by the European Helicopter Safety Analysis Team (EHSAT).
- 二、 Data from the European Safety Analysis Team (EHSAT) accident review confirms that a continuing significant number of helicopter accidents are performance related. The accident circumstances usually show that the pilot had not ensured there was sufficient power available for the intended manoeuvre, in the prevailing conditions.
- 三、 The aim of this leaflet is to examine the factors affecting aircraft performance and provide guidance to help pilots ensure that a proposed operation can be safely accomplished.
- 四、 Pilots should keep in mind that performance calculations must be part of each and every flight preparation briefing.

### **Recommendations:**

- 一、 The attachment above is just a basic concept, aircraft operator should develop their own Helicopter Performance policy.
