備註 Note	This AD supersedes EASA AD 2020-0174(CAA-2020-08-002) dated 05 August 2020.		
註： 1. AD 內容後附。 2. 航空器產品使用人得向民航局提出豁免、替代符合方法、執行時限之展延之申請。 3. 如有任何問題，請聯絡交通部民用航空局初始適航科。Tel：(02)2349-6331~3, Fax：(02)2545-8464, e-mail： adcaa@mail.caa.gov.tw Note： 1. The AD text is enclosed. 2. Exemption, an alternative method of compliance or adjustment of the compliance time may be proposed to the CAA for approval. 3. For further information, please contact Civil Aeronautics Administration on Tel：(02)2349-6331~3, Fax：(02)2545-8464, e-mail： adcaa@mail.caa.gov.tw			

Airworthiness Directive

AD No.: 2021-0229

Issued: 05 November 2021

Note: This Airworthiness Directive (AD) is issued by EASA, acting in accordance with Regulation (EU) 2018/1139 on behalf of the European Union, its Member States and of the European third countries that participate in the activities of EASA under Article 129 of that Regulation.

This AD is issued in accordance with Regulation (EU) 748/2012, Part 21.A.3B. In accordance with Regulation (EU) 1321/2014 Annex I, Part M.A.301, the continuing airworthiness of an aircraft shall be ensured by accomplishing any applicable ADs. Consequently, no person may operate an aircraft to which an AD applies, except in accordance with the requirements of that AD, unless otherwise specified by the Agency [Regulation (EU) 1321/2014 Annex I, Part M.A.303] or agreed with the Authority of the State of Registry [Regulation (EU) 2018/1139, Article 71 exemption].

Design Approval Holder's Name:

AIRBUS

Type/Model designation(s):

A318, A319, A320 and A321 aeroplanes

Effective Date: 19 November 2021

TCDS Number(s): EASA.A.064

Foreign AD: Not applicable

Supersedure: This AD supersedes EASA AD 2020-0174 dated 05 August 2020.

ATA 57 – Wings – Outer Flaps and Tabs – Identification/ Inspection (Improper Heat Treatment) / Replacement (Wrong Material)

Manufacturer(s):

Airbus, formerly Airbus Industrie

Applicability:

Airbus A318-111, A318-112, A318-121, A318-122, A319-111, A319-112, A319-113, A319-114, A319-115, A319-131, A319-132, A319-133, A320-211, A320-212, A320-214, A320-215, A320-216, A320-231, A320-232, A320-233, A321-111, A321-112, A321-131, A321-211, A321-212, A321-213, A321-231 and A321-232 aeroplanes, all manufacturer serial numbers (MSN).

Definitions:

For the purpose of this AD, the following definitions apply:

The applicable SB: Airbus Service Bulletin (SB) A320-57-1190 Revision 02 for the parts subject to improper heat treatment (IHT); and SB A320-57-1198 Revision 02 for the parts manufactured with wrong material (WM), as applicable.

Suspected IHT part: Outer flaps, having a serial number (s/n) as listed in Appendix 1 (for A318, A319 and A320 aeroplanes) or Appendix 2 (for A321 aeroplanes) of this AD, or a s/n which cannot be identified.

Suspected WM part: Outer flap tabs, having a s/n as listed in Appendix 2 (for A321 aeroplanes) of this AD, or a s/n which cannot be identified.

Affected part: A suspected IHT or WM part which did not pass (defect(s) found) a special detailed inspection (SDI) in accordance with the instructions of the applicable SB, except those that, after failing that SDI, have been repaired in accordance with applicable Airbus approved repair instructions.

Serviceable part: A part which is not a suspected (IHT or WM) part; or a suspected (IHT or WM) part which has passed an SDI (no defect found) in accordance with the instructions of the applicable SB; or a suspected (IHT or WM) part which, after failing an SDI, has been repaired in accordance with applicable Airbus approved repair instructions.

Groups: Group 1 aeroplanes are those that have a suspected (IHT and/or WM) part installed. Group 2 aeroplanes are those that do not have a suspected (IHT or WM) part installed.

Reason:

Airbus quality controls identified that several structural parts, installed on certain flaps on A320 family aeroplanes, were manufactured from improperly heat-treated materials, or wrong material. Subsequent review identified the affected flaps and established that those flaps were installed on aeroplanes manufactured between November 2011 and February 2013. From February 2013, Airbus implemented measures into the manufacturing processes to ensure detection and prevention of installation of improperly heat-treated parts or parts manufactured with wrong material.

A detailed safety assessment was accomplished to identify the possible impact of affected parts on the aeroplane structure. The result of this structural analysis demonstrated the capability of the affected structure to sustain static limit loads, but failed to confirm that the affected structures meet the certified fatigue life.

This condition, if not detected and corrected, could lead to flap trailing edge failure, possibly resulting in reduced control of the aeroplane.

To address this unsafe condition, Airbus issued the applicable SB to provide inspection instructions for suspected parts. EASA issued AD 2019-0012 to require a one-time SDI of suspected WM parts for material identification and, depending on findings, replacement with serviceable parts.

After that AD was issued, an updated list of suspected parts was identified, and EASA issued AD 2020-0174, retaining the requirements of EASA AD 2019-0012, which was superseded, including updated lists of suspected (IHT and WM) parts, and requiring a one-time SDI of suspected IHT parts and, depending on findings, accomplishment of applicable corrective action(s).

Since that AD was issued, typographical errors have been identified in some s/n of suspected parts, installed at delivery on MSN 4534, 5280 and 5281, as listed in Appendix 1 and 2 of that AD, and Airbus revised the applicable SB (now at revision 02). Furthermore, it was determined that different s/n formats have been used to identify certain suspected IHT/WM parts in production.

For the reasons described above, this AD retains the requirements of AD 2020-0174, which is superseded, updating the list of suspected parts. This AD also introduces a Note to clarify the s/n format of suspected parts.

Required Action(s) and Compliance Time(s):

Required as indicated, unless accomplished previously:

Inspection(s):

- (1) For Group 1 aeroplanes: Within 72 months after 19 August 2020 [the effective date of EASA AD 2020-0174], or before exceeding 144 months since the applicable reference date as defined in Appendix 1 or 2 of this AD, whichever occurs first, accomplish a one-time SDI of each suspected (IHT and WM) part, in accordance with the instructions of the applicable SB.

Corrective Action(s):

- (2) If, during any SDI as required by paragraph (1) of this AD, as applicable, an affected part is identified, within the compliance time(s) as defined in paragraph (1) of this AD, contact Airbus for approved instructions and, within the compliance time(s) specified in those instructions, accomplish those instructions accordingly.
- (3) Replacing an affected part on an aeroplane with a serviceable part, as defined in this AD, is an acceptable alternative method to comply with the requirements of paragraph (2) of this AD for that aeroplane, provided the compliance time(s) as defined in paragraph (1) of this AD are not exceeded. Part(s) replacement can be accomplished in accordance with the instructions of the applicable aircraft maintenance manual.

Credit:

- (4) An aeroplane having an MSN not identified in Appendix 1 or Appendix 2 of this AD is not affected by the requirements of paragraph (1) of this AD, provided it has been determined that no suspected (IHT or WM) part is installed on that aeroplane. A review of aeroplane delivery and/or maintenance records is acceptable to make this determination, provided those records can be relied upon for that purpose and the s/n of the part(s) can be positively identified from that review.
- (5) Inspections and corrective action(s) for suspected IHT or WM parts, accomplished on an aeroplane before the effective date of this AD in accordance with the instructions of Airbus SB A320-57-1190 and SB A320-57-1198 at original issue, or Revision 01, as applicable, are acceptable to comply with the requirements of paragraph (1) of this AD, as applicable, for that aeroplane.

Parts Installation:

- (6) From 19 August 2020 [the effective date of AD 2020-0174], it is allowed to install on any aeroplane a suspected (IHT or WM) part, provided that, following installation, the part is inspected as required by paragraph (1) of this AD.
- (7) From 19 August 2020 [the effective date of AD 2020-0174], it is allowed to install on any aeroplane an affected part, provided that, following installation, Airbus approved instructions

for that part are accomplished, as required by paragraph (2) of this AD, or the part is replaced as specified in paragraph (3) of this AD.

Ref. Publications:

Airbus SB A320-57-1190 original issue dated 25 January 2017, or Revision 01 dated 05 September 2018, or Revision 02 dated 11 May 2021.

Airbus SB A320-57-1198 original issue dated 24 January 2017, or Revision 01 dated 15 June 2020, or Revision 02 dated 24 May 2021.

The use of later approved revisions of the above-mentioned documents is acceptable for compliance with the requirements of this AD.

Remarks:

1. If requested and appropriately substantiated, EASA can approve Alternative Methods of Compliance for this AD.
2. Based on the required actions and the compliance time, EASA have decided to issue a Final AD with Request for Comments, postponing the public consultation process until after publication.
3. Enquiries regarding this AD should be referred to the EASA Safety Information Section, Certification Directorate. E-mail: ADs@easa.europa.eu.
4. Information about any failures, malfunctions, defects or other occurrences, which may be similar to the unsafe condition addressed by this AD, and which may occur, or have occurred on a product, part or appliance not affected by this AD, can be reported to the [EU aviation safety reporting system](#). This may include reporting on the same or similar components, other than those covered by the design to which this AD applies, if the same unsafe condition can exist or may develop on an aircraft with those components installed. Such components may be installed under an FAA Parts Manufacturer Approval (PMA), Supplemental Type Certificate (STC) or other modification.
5. For any question concerning the technical content of the requirements in this AD, please contact: AIRBUS – Airworthiness Office – IIASA; E-mail: account.airworth-eas@airbus.com.

Appendix 1 – IHT Suspected Parts – A318 A319 A320 aeroplanes (see Notes 1 and 2 of this AD)

Note 1: The aeroplane MSN as identified in Appendix 1 of this AD are for reference only, based on aeroplane configuration at the time of Airbus delivery to the first operator.

Note 2: The outer flap s/n has usually no space after 'TB'. Some parts have been identified and placarded with a s/n having an hyphen ('-') after 'TB'; a space after 'TB' is used to increase readability within certain Airbus documents, including the applicable SB: this kind of change does not effectively alter the s/n reference.

Appendix 2 – WM and IHT Suspected Parts – A321 aeroplanes (see Notes 3 and 4 of this AD)

Note 3: The aeroplane MSN as identified in Appendix 2 of this AD are for reference only, based on aeroplane configuration at the time of Airbus delivery to the first operator.

Note 4: The flap s/n has usually no space after 'TB'. Some parts have been identified and placarded with a s/n having an hyphen ('-') after 'TB'; a space after 'TB' is used to increase readability within certain Airbus documents, including the applicable SB: this kind of change does not effectively alter the s/n reference.
